

WHY STUDY NUMISMATICS

The idea is to conduct a Numismatics Workshop in a way that fascinates kids with ancient coins, and generates curiosity to know more about the people who used the coins.

THE 'RSR' APPROACH:

01. Real-time Learning:

EIH Numismatics workshop teaches a kid to read and examine a coin which helps learn new terminologies in relation to coins. It allows **comprehensive learning** and integration of unfamiliar terms in their progressive vocabulary.

02. Skill Development:

The workshop activities involve kids to sort coins of different eras by identifying material, size, symbols, etc. This can reflect into their daily life in classification or **step-by-step learning** to study, work and play.

And if the parent is super lucky they can even learn how to organize their messy rooms.

03. Research:

An hour workshop would encourage the kids to dig more deeply about Numismatics and develop a hobby in research to gain **specialized knowledge** which would be an add on to traditional schooling. Once they know the why's and how's of Numismatics, it generates a sense of value for money.

ENROUTE
INDIAN HISTORY®

HISTORY AND HERITAGE
WORKSHOPS
FOR KIDS.

ABOUT EIH:

Enroute Indian History focuses on-

- dissemination of historical knowledge
- creating awareness about heritage
- maintaining a momentum towards heritage conservation

EIH promotes Indian heritage and culture through conducting heritage walks both physical and digital, publishing research articles and presently the company has a team of over thirty researchers and writers reaching out to all age groups. The company boasts a staggering readership on Instagram alone with its visual footprint becoming visible each day. The page is widely read by some of the most prominent scholars, authors, historians, celebrities and artists in the field of fashion, interior, architecture and art.

FUN LEARN WITH EIH:

In the times of pandemic, the kids are inclined towards digital learning which sometimes hinders their attention span if it becomes too theoretical. Kids always tend to think about history as a boring subject when it comes to memorizing dates, movements, etc. EIH is here with an ultimate solution to this problem where we attempt to **let the kids experience history** through engaging them with fun workshops which help them build their own stories and connect with Indian history joyfully.

OBJECTIVES:

1. Understanding the basis of numismatic studies and their importance.
2. Enable kids to correlate coinage with economy, technology and culture.
3. Enable kids to identify coins of different major dynastic periods in Indian History.
4. Understanding how coins are made, designed and traded.
5. Understanding the evolution of coinage within the Indian Subcontinent.

ABOUT EIH WORKSHOPS:

Enroute Indian History welcomes kids between the ages of **10-14yrs** to enroll in a series of workshops which allows them to learn Indian history in an interactive environment. These workshops will be well crafted by our team of heritage experts introducing various engrossing history topics.

The very first workshop will be about **the study of Numismatics** - is the study and collecting of coins and the history behind the coins.

TEACHING AID:

The workshop is well fabricated in several activity slots where the kids will have exposure towards interactive history through brainstorming discussions, question triggering activities and creative crafting concepts.

Teaching Methodology includes:

- child friendly presentations and fun infographics.
- self-assessed home-schooling activities.
- printable worksheets designed with fascinating history graphics.
